

Gaming Series

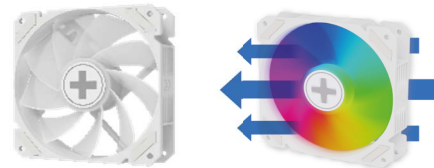

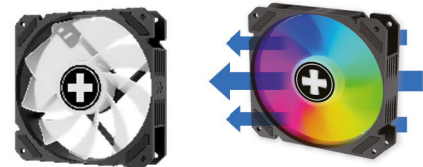

120mm PWM ARGB REVERSE case fan

The reverse fans offer powerful cooling in an unusual design and ensure that the air flows quietly in the opposite direction. The modern design and filigree lines not only ensure a striking look, but also optimize air circulation. Available in black and white, the 120 mm fans are the perfect match for any gaming setup.

With PWM control, the case fans can be easily regulated individually and remain quiet even during intensive use. The addressable ARGB lighting enables individual lighting effects and seamless synchronization with common controllers.

Hydro bearings ensure a long service life and virtually silent operation. The Reverse Fans combine efficiency, style and reliability.

The Reverse Fans can be combined well with the Xilence Gleam PC case.

Product Features

- Inverted rotor blades that allow the air to flow quietly in the opposite direction
- Available in elegant black and timeless white
- Automatic fan speed adjustment via PWM for optimum cooling
- Individually addressable lighting effects with synchronization option
- Durable hydro bearings for quiet and reliable operation
- Quiet noise level even at higher performance

Technical Data

Fan dimensions	120 x 120 x 25mm
Connection type	4PIN
Connection type LED	5V ARGB 3pin Female
Fan volume	Max: 29.6dB(A)
PWM	✓
Fan bearing	Hydro Bearing
Air flow rate	63.53CFM
Fan speed	600-1500RPM
Fan weight	130g

Logistical Data

Manufacturer Number	XF065	XF066
Item Number	XPF120R.ARGB	XPF120R.W.ARGB
EAN Barcode	4044953504143	4044953504167
